	Minimum criteria	
	Assoc. Prof.	Prof.
1. Pedagogical activities and developing learning materials	*)	**)
Pedagogical activities	last 3 years after PhD. completion at the date of application	last 3 years after obtaining Assoc. Prof. at the date of application
University textbook	1 (3 AH)	1 (3 AH)
or teaching material, course book	1 (3 AH)	2 (3 AH)
2. Scientific research activity ***)		
publications <i>in extenso</i> in the categories A+, A, A-, B	20	40
- of which first author or corresponding author	10	20
first author or corresponding author in publication <i>in extenso</i> in the categories A+, A	3 (1)	6 (2)
3. Responses to publication outputs		
Responses registered in WoS or SCOPUS	20	50
4. Scientific School		
Supervision of PhD. students ****)		1 (1)
Member of a research project of grant agencies	1	2

5. Other specifications In the case of habilitation or inauguration procedure in a clinical field, a higher degree qualification (atestácia) or successful completion of specialisation studies in the study field or in a related field in which the habilitation or inauguration procedure is being carried out is required.		
6. Professional experience	5 years	8 years

*) Teaching activities carried out for at least 50 % of the established weekly working time for a minimum period of last 3 years after obtaining the academic degree of PhD. at the date of application in the subjects of the discipline or a related discipline in which the applicant is to be awarded the degree of Associate Professor

***) Teaching activities carried out for at least 50 % of the established weekly working time for a minimum period of last 3 years after obtaining the degree of associate professor at the date of application in the subjects of the discipline or a related discipline in which the applicant is to be awarded the degree of professor. Only the period during which the applicant has been employed by the university is taken into account for the performance of teaching activities.

****) In brackets are the numbers for the last 5 years.

*****) One graduated PhD. student and one after the dissertation exam is sufficient.

Research output classification:

A+	research publication <i>in extenso</i> in journals Q1 or Q2
A	research publication <i>in extenso</i> in journals Q3 or research publication which has more than 10 indexed citations
A-	research publication <i>in extenso</i> in journals Q4 or research publication <i>in extenso</i> in journals indexed in WoS or SCOPUS
B	research publication <i>in extenso</i> in other peer-reviewed journals and peer-reviewed proceedings

Quartile classification of the journal according to WoS JCR in the year of publication is accepted.

Preference shall be given to the quartile of the journal in the discipline or in a related field that is related to the field of the habilitation or inauguration procedure.

If a journal is classified in more than one discipline with different quartile values, the more valuable quartile is taken into account.

Common provisions:

The minimum criteria to obtain the scientific-pedagogical degree "associate professor" and the scientific-pedagogical degree "professor" cannot be substituted by the fulfilment of other criteria. The fulfilment of all the criteria does not confer a legal entitlement to the academic degrees of associate professor and professor.

The minimum criteria to obtain the degree of associate professor and the degree of professor at JFMED CU effective from September 1, 2022 are cancelled.

The minimum criteria to obtain the degree of associate professor and the degree of professor at the Jessenius Faculty of Medicine in Martin Comenius University in Bratislava come into force on the date of their approval by the Scientific Board of CU and enter into force on October 4, 2022.

prof. JUDr. Marek Števček, DrSc.
chair of the Scientific Board of CU
