TABLE OF CONTENTS

1. J-2-OS-044/22 Assessment and Management of the Acutely Deteriorating Patient..... 2
2. J-2-OS-016/22 Communication in Nursing..... 5
3. J-2-OS-SS1/19 Defense of Diploma Thesis **(state exam)**..... 8
4. J-2-OS-005/22 Evidence Based Nursing..... 10
5. J-2-OS-007/18 Health Promotion and Prevention..... 12
6. J-2-OS-026/22 Management and Quality of Services in Health Service..... 15
7. J-2-OS-027/22 Management of Human Resources in Health Service..... 17
8. J-2-OS-045/22 Mentoring in Nursing..... 19
9. J-2-OS-002/18 Nursing Ethics..... 21
10. J-2-OS-004/18 Nursing II-1..... 24
11. J-2-OS-013/22 Nursing II-2..... 27
12. J-2-OS-SS2/19 Nursing II. **(state exam)**..... 30
13. J-2-OS-003/22 Nursing Practice (1)..... 37
14. J-2-OS-011/22 Nursing Practice (2)..... 40
15. J-2-OS-017/22 Nursing Practice (3)..... 42
16. J-2-OS-028/22 Nursing Practice (4)..... 45
17. J-2-OS-012/22 Nursing Research II-1..... 48
18. J-2-OS-018/19 Nursing Research II-2..... 50
19. J-2-OS-029/19 Nursing Research II-3..... 52
20. J-2-OS-041/26 Nursing care for seniors and geriatric patients (1)..... 54
21. J-2-OS-042/26 Nursing care for seniors and geriatric patients (2)..... 57
22. J-2-OS-043/26 Nursing care for seniors and geriatric patients (3)..... 60
23. J-2-OS-001/18 Patient safety..... 63
24. J-2-OS-014/26 Pedagogy in Nursing..... 65
25. J-2-OS-010/22 Summer Practice (1)..... 68
26. J-2-OS-008/18 Winter Practice (1)..... 71
27. J-2-OS-019/22 Winter Practice (2)..... 73

COURSE DESCRIPTION

Academic year: 2026/2027	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OS-044/22	**Course title:** Assessment and Management of the Acutely Deteriorating Patient
Educational activities: **Type of activities:** practicals **Number of hours:** **per week:** 2 **per level/semester:** 28 **Form of the course:** on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: CS (15 hours) – study of the literature, preparation for presentation/report, and preparation for the test. Student assessment is pursued by continuous evaluation of presentation/report, a final written knowledge test, final verification of clinical competencies using the OSCE method, and evaluation of the semester paper . Overall grading: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX: 59% and less. Scale of assessment (preliminary/final): 10/90	
Learning outcomes: By completing the course, the student will acquire theoretical knowledge, practical skills, and clinical competences in recognising, assessing, and managing the acute condition of an older adult and geriatric patient in a hospital setting, with an emphasis on a holistic approach, clinically correct and safe practice performance, and adherence to the principles of evidence-based practice. The student will be able to describe the standardised procedure of acute patient care according to the ABCDE approach. The student will be able to implement the constituent steps of recognition, assessment, and management of acutely deteriorating patient following the ABCDE framework, within the scope of nursing competency, when solving case studies and simulated scenarios in the safe environment of a simulated care unit. Using modern methodological approaches (ABCDE, (I)SBAR, OSCE), available simulation-based learning technologies (static models for skills training, full-body simulators), and teaching methods such as simulation, demonstration, and practical training, the student will be able to improve technical and procedural skills, non-technical skills, and clinical competences (situation assessment, critical thinking, patient preparation, instrumental performance, teamwork, patient communication, etc.). The student will be able to recognise when it is necessary to immediately call for/request help. The student will be able to identify the interventions that must be carried out (independently, in collaboration, or delegated) as a part of acutely deteriorating patient management. The student will be able to define the principles, and roles of the nurse, within team collaboration while patient resuscitation in the hospital environment and actively participate in a simulated scenario (resuscitation of a hospitalised	

patient). The student will be able to strengthen his/her ability to respond adequately to the sudden onset of an acutely deteriorating hospitalised patient. Will be able to refine skills in effective, standardised communication of critical events in clinical practice using the (I)SBAR method. The acquired clinical competences, together with the ability to justify and argue the chosen course of action, will provide the foundation for clinically correct and safe responses in real-life clinical practice in the context of acute care for older adults and geriatric patients.

Class syllabus:

Recognition, assessment and management of the acutely deteriorating patient's condition – systematic, standardized ABCDE approach.

The constituent components of the ABCDE approach – assessment and management within the scope of the nurse competency:

A – Airway – assessment and management.

B – Breathing – assessment and management.

C – Circulation – assessment and management.

D – Disability – assessment and management.

E – Exposure/Examination – assessment and management.

Standardized communication of critical events in clinical practice using the (I)SBAR method. Resuscitation of a hospitalized patient.

COURSE DESCRIPTION

Academic year: 2026/2027	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OS-016/22	**Course title:** Communication in Nursing
Educational activities: **Type of activities:** practicals / lecture **Number of hours:** **per week:** 1 / 2 **per level/semester:** 14 / 28 **Form of the course:** on-site learning	
Number of credits: 3	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Course requirements: CS (20 hours) – study of the literature and preparation for the test. CPO (30 hours) – preparation of presentations and reporting on assigned tasks; elaboration of a semester paper on the given topic, and its presentation/report with a practical output. Student assessment is pursued by continuous evaluation of presentations/reports, a final written knowledge test, and evaluation of the semester paper. Overall grading: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX: 59% and less. Scale of assessment (preliminary/final): 40/60	
Learning outcomes: By completing the course, the student will enhance the knowledge, skills, and competences in effective verbal, non-verbal, and paralinguistic communication within the context of interpersonal and interdisciplinary relationships in nursing. The student will be able to implement acquired theoretical knowledge and communication skills in the provision of individualised nursing care, and employ selected theoretical models in self-reflection and reflection on nursing practice, as well as in team information handover. The student will be able to specifically adapt communication skills to the needs and preferences of the patient when establishing the nurse–patient relationship, collecting data for the assessment and management of patient needs, communicating with selected groups of patients, delivering “bad” news, and providing palliative nursing care in different stages of the patient’s illness, during the dying phase, after the patient’s death, and in supporting the bereaved through the grieving process.	
Class syllabus: Communication as a fundamental professional competence of the nurse – relational and content aspects of communication, the communication process, communication barriers, and communication skills. Interpersonal communication – verbal, non-verbal communication and paralinguistics, empathy, and active (reflective) listening in nursing practice.	

Interdisciplinary communication – effective teamwork, communication, and sharing information within the team using the structured SBAR/ISBAR model (identify, situation, background, assessment, recommendation/request).
Intrapersonal communication – self-reflection and reflection on nursing practice (application of Gibbs reflective cycle).
Communication in palliative nursing care – the nurse–patient relationship in palliative care, the importance of communication, factors affecting communication, delivering "bad" news, communication with the patient and his/her significant others in the phase of patient's active dying, and communication with the bereaved after the patient's death.
Communication with selected groups of patients.

STATE EXAM DESCRIPTION

Academic year: 2026/2027	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OS-SS1/19	**Course title:** Defense of Diploma Thesis
Number of credits: 5	
Recommended semester: 3., 4..	
Educational level: II.	

Course requirements:

The state exam can be carried out by the student after the fulfilment of the obligations stated in the study program.

Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.

Learning outcomes:

The graduate can know the basics of scientific work in the field of nursing and methods of obtaining scientific and professional information. He/she is able of developing nursing practise, critical thinking and exploiting results of the research. The graduate can know the basics of work in a multimedia environment and understands the basics of one world language. The graduate can enter into practice as a convinced defender of the independence of his/her profession and modern trends in nursing theory and practice. He/she can adhere to the principles of nursing ethics, which he/she is a carrier.

Class syllabus:

Quantitative and qualitative research. Scientific methods and its classification.

Ethical aspects of nursing research.

Operation with scientific literature and other documents. Searching for literary sources, its utilisation and processing. Processing and storage of scientific information. In-text citation. Reference list.

Research project and its phases. Characteristics and importance of the particular phases of the research process. Formulation of research problems, questions and hypotheses. Possibilities of the determination of research problems, aims and tasks in nursing, proposal of their solution, possibilities of verification, method selection.

Criteria for selecting a research tool.

Preparation and processing of obtained empirical data. Descriptive and inductive statistics and their application in the data processing. Qualitative methods. Qualitative data analysis. Casuistry – a case study. Preparation and utilisation. The methodology of verbal responses processing.

Interpretation of obtained data, discussion, conclusions.

Formal and content requirements of the master thesis.

Presentation of the results - verbal, written. Language and scientific style of the thesis.

Preparation of presentation, preparation for defense.

Approved by: prof. Mgr. Katarína Žiaková, PhD., doc. Mgr. Ivana Bóriková, PhD., doc. Mgr. Martina Tomagová, PhD.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-005/22	Evidence Based Nursing

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 1 / 1 **per level/semester:** 14 / 14
Form of the course: on-site learning

Number of credits: 2

Recommended semester: 1.

Educational level: II.

Prerequisites:

Course requirements:
CPO (15 hours) preparation of a written paper focused on the formulation of a PICO question, search and analysis of the evidence found.
The evaluation of students is carried out through evaluation of the written paper and exam in the form of a test.
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.
Scale of assessment (preliminary/final): 40/60

Learning outcomes:
After completing the subject, the student is able to characterize the importance of evidence-based nursing for research and nursing practice. Can formulate a clinical question, choose an appropriate strategy for seeking evidence from research studies.
The student is able to search the evidence in appropriate information sources; critically evaluate the level and quality of evidence obtained. The student can describe the process of implementing the obtained evidence into clinical practice. The student is able to apply the acquired knowledge in clinical practice.

Class syllabus:
Evidence-based nursing: characteristics, significance, steps of the evidence-based nursing process
PICO question formulation
Information resources
Searching for evidence in information sources
Evaluation of the quality of the evidence obtained
Clinical guidelines: characteristics, significance, development, implementation into clinical practice
Clinical guidelines: searching for clinical guidelines and their analysis
Implementation of evidence-based practice into nursing practice
Evidence-based nursing - conditions and barriers in teaching and clinical practice.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚVZ/J-2-OS-026/22	Management and Quality of Services in Health Service

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 2 / 2 **per level/semester:** 28 / 28
Form of the course: on-site learning

Number of credits: 6

Recommended semester: 4.

Educational level: II.

Prerequisites: JLF.ÚVZ/J-2-OS-027/22 - Management of Human Resources in Health Service

Recommended prerequisites:
Management of human resources in healthcare

Course requirements:
Evaluation
Active participation in block teaching is mandatory. The instructor may excuse a student's absence in the case of relevant reasons up to a maximum of 20% of the total instruction time, in accordance with the Study Regulations of the JLF UK.
Conditions for successful completion of the course (max. 100 points):
a/ PPT presentation – max. 10 points
b/ Written work – management project – max. 30 points
c/ Oral exam – max. 60 points
OVERALL ASSESSMENT OF THE COURSE
Points achieved Grade
100 – 91 A / 1 (excellent)
90 – 81 B / 1.5 (very good)
80 – 73 C / 2 (good)
72 – 66 D / 2.5 (satisfactory)
65 – 60 E / 3 (sufficient)
59 and below FX (insufficient)
The condition for successfully completing the course is achieving a minimum of 60 points in the overall assessment.
Scale of assessment (preliminary/final): 40/60

Learning outcomes:
Students get general knowledge on functions, roles and skills of a manager in health sector, they master planning, organization, management and control of activities of workers at a health organization by means of modern tools and methods of management, they can find solutions and propose improvements in a position of manager.

Class syllabus:

Management as a scientific branch. Managers and working groups in healthcare facilities. Team cooperation in healthcare. Management of changes and transformation managing. Decision making. Health services. Managerial functions. Strategic management in healthcare. Influences of external and internal environments in healthcare. Quality of healthcare services. Information and information management in healthcare facilities. E - Health.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-045/22	Mentoring in Nursing

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 1 / 1 **per level/semester:** 14 / 14
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 3.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-014/22 - Pedagogy in Nursing

Course requirements:
CS (20 hours) study of literature for the elaboration of a semestral thesis and for the preparation for teaching.
CPO (30 hours) elaboration of semester work, preparation for teaching and realization of teaching in natural conditions.
The evaluation of students takes place in the form of evaluation of the presentation of preparation for teaching and the implementation of teaching (exam), the minimum percentage to succeed is 60%.
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.
Scale of assessment (preliminary/final): 50/50

Learning outcomes:
At the end of this course, a student is able to demonstrate knowledge in the field of education of adults with emphasis on their specific use in nursing. The student can demonstrate comprehensive knowledge of relevant concepts and principles coupled with orientation in the field of basic pedagogical documents in relation to nursing. The student is able to prepare a plan for the lesson, implement it to the lesson and lead his tutee during the implementation of practical activities. The student is able to incure a positive approach to the management and the evaluation of practical activities besides a support of nursing students in the execution of their professional practice. Moreover, he participates in a more effective integration of theory with practice.

Class syllabus:
Organization studies of nursing (EU - strategic documents of schooling of nurses, nursing education - structure, requirements, lifelong learning).
Nursing legislation.
Objectives and thematic plan of clinical and practical nursing subjects in the field of nursing. Role and competencies of the mentor.
Fundamentals of teamwork - integration of students into an interdisciplinary team, people management and feedback.
Learning, teaching process in adult education.
Didactic principles of clinical practice. Lesson preparation.

Setting goals for the student within the practical activities in addition to their evaluation.
Teaching methods usable in the work of a mentor.
Clinical supervision of students. Student assessment methods - strategies for assessing student's ability to perform practical tasks.
Preparation of lessons, clinical exercises.
Management a clinical exercise / seminar.

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-002/18	Nursing Ethics

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 1 / 1 **per level/semester:** 14 / 14
Form of the course: on-site learning

Number of credits: 2

Recommended semester: 1.

Educational level: II.

Prerequisites:

Course requirements:
Student evaluation is carried out through knowledge test, active participation in seminars, and presentation of the text with discussion.
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.
Scale of assessment (preliminary/final): 34/66

Learning outcomes:
The student is able to advance knowledge about the problems of ethics in the context of nursing, understand ethical theories, principles, and their importance in education, practice, and research in nursing. The student is able to apply knowledge to case studies, can analyse them, and identify problems and dilemmas in nursing practice. The student can solve moral problems, argue own attitudes. The course contributes to the formation of moral attitudes of students to nursing, patients, and other health professions in team cooperation.

Class syllabus:
Nursing ethics as a discipline. Basic concepts of nursing ethics: vulnerability (lived experience), care (dialogical-interpretative), and dignity (normative standard).
Selected ethical theories (deontology, principalism, utilitarianism, ethics of virtue, and ethics of care) and their reflection in nursing ethics.
Ethical aspects of the nurse-patient relationship. Paternalism, trust, the concept of patient advocacy. Moral sensitivity, moral reasoning, and moral distress. Dilemmas in nursing practice and possibilities of their solution: problems of patient information, refusal of nursing care, limitation of resources and distributive justice, everyday moral dilemmas
Ethical aspects of caring for the elderly. Ageism. The dignity of the elderly and its implementation in nursing care. Intimacy and sexuality of older people.
Ethical aspects of end-of-life care. Withholding or withdrawing of futile treatment, palliative sedation, assisted dying and the role of nurses.
Ethical aspects of the relationship between nurses and other health professionals. Dignity and autonomy of nurses.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-004/18	Nursing II-1

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 1 / 1 **per level/semester:** 14 / 14
Form of the course: on-site learning

Number of credits: 2

Recommended semester: 1.

Educational level: II.

Prerequisites:

Course requirements:
Student assessment is carried out through the preparation of a presentation on a selected topic and the evaluation of a seminar paper.
Overall evaluation: A = 100 – 91 % bodov, B = 90 – 81 % bodov, C = 80 – 73 % bodov, D = 72 – 66 % bodov, E = 65 – 60 % bodov, FX < 60 %
Scale of assessment (preliminary/final): 20/80

Learning outcomes:
After completing the subject, the student is able to follow legal regulations related to the nursing profession; they can define ethical and professional standards and apply them in practice. The student understands the structure of documentation, can make accurate entries, and is able to demonstrate the use of selected assessment and measurement techniques in evaluating specific clinical problems of the patient. They can explain the issue of nursing diagnosis and draw conclusions for clinical practice. The student is able to justify the differences between educational and healthcare documentation. They can describe the issue of missing nursing care, its causes, and its impact on patients and nurses. The student can justify preventive strategies and actively apply them in clinical practice. They are able to explain the importance of professionalism, analyze individual phenomena of professionalism, and critically evaluate the situation within our sociocultural context. The student can justify the division of competencies based on education and length of practice.

Class syllabus:
Professionalism in nursing and its attributes. Theoretical frameworks for studying professionalism. Professional socialization. Professional identity of the nurse.
Evaluative and measuring techniques in nursing. Selection criteria of instruments for nursing practice. The importance of their utilization in the preparation of nursing care plans.
Issues related to the use of nursing diagnoses.
Nurses' competencies and legislation in the Slovak Republic.
The concept of missed, rationed and unfinished nursing care related to patient safety and quality of nursing care.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-013/22	Nursing II-2

Educational activities:
Type of activities: practicals
Number of hours:
per week: 2 **per level/semester:** 28
Form of the course: on-site learning

Number of credits: 1

Recommended semester: 2.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-004/18 - Nursing II-1

Course requirements:
Student evaluation is conducted through an oral presentation on a selected topic and an oral examination.
Overall evaluation: A: 100–91%, B: 90–81%, C: 80–73%, D: 72–66%, E: 65–60%, FX: 59% and less.
Scale of assessment (preliminary/final): 20/80

Learning outcomes:
After completing the subject, the student is able to know and able to follow legal regulations related to the nursing profession, define ethical and professional standards and apply them in practice.
They can assess and evaluate the work environment and propose measures for improvement. They understand the importance of teamwork and can implement interventions to strengthen it. The student is able to characterize both the content and scope of education, including competency-based education. They can justify the differences between educational and healthcare documentation. They are able to explain the process of standardization and its significance.

Class syllabus:
The student can explain the importance of the work environment for the quality and safety of nursing care and identifies factors affecting nurses' job satisfaction. He/She can apply SWOT analysis when evaluating the workplace and propose measures to improve the work environment. The student distinguishes the basic principles of leadership and management and characterizes individual leadership styles in nursing practice. He/She applies the principles of effective communication, teamwork and solving managerial situations in the healthcare environment. He/She characterizes the system of lifelong education for nurses and explains the principles of competency-based education. He/She describes the concept of advanced nursing practice and its importance for the development of healthcare quality. He/She can explain the causes and consequences of nurse turnover on the quality and continuity of nursing care. He/She analyzes the factors influencing nurses' decisions to stay or leave the workplace and suggests options for their stabilization. He/She can use standards and care maps when planning, implementing and evaluating patient care. The student characterizes the importance of compassion and compassionate care in professional

nursing practice. Applies the principles of empathetic communication and a respectful approach to the patient and their family when providing care.

STATE EXAM DESCRIPTION

Academic year: 2026/2027	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OS-SS2/19	**Course title:** Nursing II.
Number of credits: 5	
Recommended semester: 3., 4..	
Educational level: II.	

Course requirements:

Final state exam may be taken by students who have fulfilled all the obligations set by their study program.

Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.

Learning outcomes:

Graduate master the principles of nursing and are able to apply them in their profession. They are generally educated and professionally prepared to understand the connections between nursing science, biomedical sciences, social sciences, and human sciences, and are able to transform this knowledge into a holistic approach in nursing practice. Graduate have theoretical knowledge of the fields that describe the organs and systems of healthy and sick people, deal with their mental processes and characteristics, social environment, cultural influences, as well as their spirituality, faith, and worldview, so that they are able to support and protect health, prevent the onset of disease, educate and motivate individuals, families, and entire communities to adopt a healthy lifestyle, and provide quality nursing care.

Graduate have the abilities and skills to perform nursing activities for people in health and sickness, from the prenatal period to the period of dying and death. Graduate have the theoretical and practical abilities to appropriately choose a nursing model and use the nursing process. Graduate are prepared to perform the tasks of the nursing profession. They have the ability to manage and provide nursing care – preventive, educational, supportive, therapeutic, rehabilitative, or auxiliary – to individuals, families, and groups. They have the ability to lead and actively and effectively integrate into a healthcare team. Graduate understand humans holistically as the result of the interaction of biological, physical, chemical, psychological, social, spiritual, and other influences of the external and internal environment on humans. Graduate master the basics of scientific work in the field of nursing and methods of obtaining scientific and professional information. Through the study of nursing, graduate gain motivation for further personal and professional growth through lifelong learning. They comply with the legislation necessary for the practice of the nursing profession. Graduate master the basics of working in a multimedia environment and the basics of one world language. He/she are prepared to continue their studies.

He/she master the basics of working in a multimedia environment and the basics of one world language. Graduate are prepared to continue their studies.

Graduate enter working life as committed advocates of the independence of their profession and modern trends in nursing theory and practice. Graduate adhere to humanistic principles, respect life, human dignity, and human rights. They develop the ability to empathize. They are guided by the principles of nursing ethics, which they adhere to. Graduate are prepared to manage the nursing process in all types and at all levels of healthcare facilities. They are familiar with the

organizational principles of various types of primary, secondary, and tertiary healthcare facilities. Graduate have the theoretical and practical skills to appropriately select a nursing model and apply the nursing process. Graduate are prepared to perform the tasks of the nursing profession. He/she have the ability to manage and provide nursing care – preventive, educational, supportive, therapeutic, rehabilitative, or auxiliary – to individuals, families, and groups. He/she has the ability to actively and effectively integrate into a healthcare team. He/she knows how to develop nursing practice, think critically, and utilize research findings. He/she knows how to work in the context of evidence-based nursing.

Class syllabus:

Aging of the Slovak population, heterogeneity of the senior population, priorities of clinical geriatrics and gerontological nursing. Frailty syndrome in seniors, characteristics of frailty, factors contributing to frailty, frailty screening, nursing diagnosis, prevention of frailty. Geriatric patients, characteristics, indicators of health status and prognosis, geriatric symptoms and syndroms. Assessment of the functional status of seniors and geriatric patients: concept of functional diagnostics, goals and areas of screening and in-depth assessment, measurement tools.

Geriatric immobility syndrome. Geriatric instability and falls syndrome. Geriatric malnutrition and dehydration syndrome. Psychological geriatric syndromes – depression, delirium, dementia. Geriatric syndrome of neglect, abuse, maltreatment; violence against seniors. Nursing diagnostics and interventions in connection with geriatric syndromes. Specifics of the clinical picture, diagnostics, and course of surgical diseases in seniors and geriatric patients. Management of nursing care in surgery in seniors and geriatric patients undergoing acute and emergency surgery. Preoperative assessment of seniors and geriatric patients, surgical risk, nursing care in the preoperative period. Postoperative complications in elderly and geriatric patients, nursing care in the prevention of postoperative complications. Postoperative nursing care for seniors and geriatric patients in the intensive care unit and standard nursing unit. Patient safety as a component of quality care: safety culture, international guidelines, legislative standards in the Slovak Republic. Adverse events – types, reporting systems. Communication as a basic professional skill of a nurse. Interpersonal communication, empathy, and active listening in nursing. Intrapersonal and interdisciplinary communication in nursing. Team communication, team communication tools, structured SBAR/ISBAR model. Communication in palliative nursing care – nurse-patient relationship in palliative care, importance of communication, delivering "bad" news, communication with the patient and their loved ones in the active dying phase, communication with the bereaved after the patient's death.

Patient safety in the operating room: safety checklist for surgery. Minimizing adverse events associated with invasive procedures/surgery. Nosocomial infections, requirements for safe practice: prevention/minimization of the occurrence and spread of infection. Impact of infections on patient care costs. Safety of pharmacotherapy: medication errors and their causes, reduction of medication errors, requirements for safe performance of pharmacotherapy. Pressure ulcers developed during hospitalization: pressure ulcers as an indicator of quality of care and as an adverse event, key interventions in the prevention of pressure ulcers and in the treatment of pressure ulcers. Falls during hospitalization: falls as adverse events, screening and assessment of fall risk, preventive and protective interventions, post-fall analysis, staff education. Systematic standardized ABC D E approach to the recognition, assessment, and management of acute patient conditions. The concept of missing, assigned, and unfinished nursing care in relation to patient safety and the quality of nursing care. Predictors, reasons, and outcomes. Evidence-based nursing, characteristics of the phase, significance, conditions and barriers in teaching and clinical practice. Standardization of nursing care. Standards and maps of nursing care. Clinical recommended procedures. Individualization versus standardization of nursing care. Professionalism in nursing and its attributes. Professional socialization. Measurement tools in nursing. Issues of translation

and modification of measurement tools. Competencies of nurses. Definition and characteristics of the concept. EFN framework of competencies for nurses. Decree No. 208/2024 Z. z. Continuing education in nursing. Nursing ethics as a discipline. Basic concepts of nursing ethics:
vulnerability, care, and dignity. Moral identity and dignity of nurses. Selected ethical theories and their reflection in nursing ethics. Ethical aspects of the nurse-patient relationship: paternalism and autonomy, trust, the concept of patient advocacy. Moral competencies and decision-making:
moral sensitivity, moral reasoning, moral distress, and dilemmas. Ethical aspects of caring for seniors. Ageism. The dignity of seniors and its implementation in nursing care. Managers in healthcare. Work activities and the application of basic managerial functions in the work of a healthcare manager in various types of healthcare facilities. Internal environment and external influences on activities in a healthcare organization. Team management. Strategic management in a healthcare organization. Quality management in healthcare. Quality management system in a healthcare organization. Personnel activities and human resources in a healthcare organization. The importance and application of basic legislation in human resource management and its impact on healthcare practice. Educational goals and their function in nursing education – concept, formulation of goals, taxonomy of goals. Educational standards. Didactic methods, characteristics, classification, activating teaching methods in nursing. Mentor in nursing, role and competencies of a mentor. Learning and teaching process in adult education. Clinical supervision of students. Student assessment methods – strategies for assessing students' ability to perform practical tasks. Models and theoretical frameworks for health promotion (opinion model, health promotion model, preparation and procedure model, communication model of behavior change).
Individual behavior in relation to health and the possibility of change. Health promotion and prevention. Basic principles and foundations of health promotion. Determinants of health, assessment of health risks. Health literacy and compliance in prevention and health promotion. Screening, preventive examinations, dispensary care. Health promotion and prevention in different age groups and health promotion programs. Quantitative research, objectives, data collection methods (questionnaires, scales), evaluation methods, validity, reliability of research. Qualitative research, objectives, data collection methods (interviews, focus groups), evaluation methods, credibility in qualitative research.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-003/22	Nursing Practice (1)

Educational activities:
Type of activities: practice
Number of hours:
per week: 16 **per level/semester:** 224
Form of the course: on-site learning

Number of credits: 7

Recommended semester: 1.

Educational level: II.

Prerequisites:

Course requirements:
Evaluation of nursing documentation developed for the selected patient, including the justification of the planned nursing interventions through researched evidence from research studies.
Final evaluation of the student - communication skills, teamwork, attendance, grooming, hygiene and epidemiological regime, practical skills and theoretical knowledge, ethical standards.
Allocation sheet, Safety regulations, and record of arrivals and departures at the workplace
List of Practical Outputs
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.
Scale of assessment (preliminary/final): 0/100

Learning outcomes:
After completing the course, the student will be able to provide individualized nursing care to older adults and geriatric patients with various, predominantly chronic conditions, in diverse clinical settings, including community-based care facilities,focusing on a holistic approach, clinically appropriate and safe practice, respecting the principles of evidence-based practice. The student is able to apply the management of chronic symptomatology and patient safety. The student is able to think clinically and critically. The student is able to provide patients with adequate and high-quality nursing care in health and disease, respecting professional and ethical norms. The student is able to improve basic and advanced nursing techniques and skills and specific diagnostic and therapeutic techniques in the standard care and intensive care units. The student is able apply the nursing process method with an emphasis placed on comprehensive patient assessment, physical examination within the scope of nurse's competency, administration of measuring tools to detect actual/ potential patient problems within the scope of the nurse's competency, masters planning and implementing (independent, collaborative or delegated) individualized nursing care, including discharge, planning, and targeted patient/ family education. The student is able to justify the planned nursing interventions through the evidence found from the research studies.

Class syllabus:
Implementation of the nursing process method in the care of the patient in the acute condition (in case of acute admission) and the planned admission of the older adult or geriatric patient.

Nursing physical examination of a patient.
Assessment of patient needs and problems, administration of measuring tools within the scope of the nurse´s competency (selected areas of assessment). Assessment of health risks and ensuring patient safety.
Management of symptomatology of chronic diseases.
Implementation of fundamental and specialised nursing techniques.
Management of health records within the scope of nursing care.
Nursing rehabilitation of the patient.
Discharge planning of the patient for home care and community care.
Targeted patient/ family education to acquire knowledge and practical skills during hospitalization and discharge planning for home care (self-management of symptomatology, adherence to treatment and regimens).
Elaboration of nursing documentation for a patient with a selected disease, including the justification of planned nursing interventions through the evidence from the research study.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-017/22	Nursing Practice (3)

Educational activities:
Type of activities: practicals
Number of hours:
per week: 16 **per level/semester:** 224
Form of the course: on-site learning

Number of credits: 7

Recommended semester: 3.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-011/22 - Nursing Practice (2)

Course requirements:
CPO (60 hours) seminar work focusing on the preparation of care plan or care map in patients in older adult or geriatric patients for the needs of clinical workplace.
Final evaluation of the student - communication skills, teamwork, attendance, grooming, hygiene and epidemiological regime, practical skills and theoretical knowledge, ethical standards.
Allocation letter, Safety regulations, and Record of Arrivals and Departures at the Workplace, List of Practical Outputs.
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.
Scale of assessment (preliminary/final): 0/100

Learning outcomes:
After completing the course, the student will be able to provide individualized nursing care to older adults and geriatric patients with various, predominantly chronic conditions, in diverse clinical settings, including community-based care facilities, emphasizing a holistic approach, clinically appropriate and safe practice, respecting the principles of evidence- based practice. The student can apply the management of chronic symptomatology and patient safety. The student can think clinically and critically. The student can provide patients with adequate and high-quality nursing care in health and disease, respecting professional and ethical norms. The student is able to improve basic and advance nursing techniques and skills and specific diagnostic and therapeutic techniques at the standard care and intensive care units. The student can apply the nursing process method and education process. Student can apply in practice theoretical knowledge in developing educational material and educational program for the needs of the clinical workplace in adult or elderly patient. Can apply theoretical knowledge in clinical practice in the development of care plans and maps for the needs of the clinical workplace. The student will acquire knowledge of technical innovations related to health and nursing care methods.

Class syllabus:
Implementation of the nursing process method in the care of the patient in the acute condition (in case of acute admission) and the planned admission of older adult or geriatric patient. Nursing physical examination of a patient.

Assessment of patient needs and problems, administration of measuring tools within the scope of the nurse´s competency (selected areas of assessment). Assessment of health risks and ensuring patient safety.
Management of symptomatology of chronic diseases.
Implementation of fundamental and specialised nursing techniques.
Management of health records within the scope of nursing care.
Nursing rehabilitation of the patient.
Discharge planning of the patient for home care and community care.
Education of older adults or geriatric patien or family education to acquire knowledge and practical skills during hospitalization and discharge planning for home care (self-management of symptomatology, adherence to treatment and regimens).
Elaboration of care plan or care map in older adult or geriatric patient with a selected health condition for the needs of the clinical workplace.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-028/22	Nursing Practice (4)

Educational activities:
Type of activities: practicals
Number of hours:
per week: 16 **per level/semester:** 224
Form of the course: on-site learning

Number of credits: 9

Recommended semester: 4.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-017/22 - Nursing Practice (3) and JLF.ÚO/J-2-OS-019/22 - Winter Practice (2)

Course requirements:
CPO (60 hours) seminar work focusing on preparation of an educational material or educational program of older adult or elderly patients with selected health condition.
Final evaluation of the student - communication skills, teamwork, attendance, grooming, hygiene and epidemiological regime, practical skills and theoretical knowledge, ethical standards.
Allocation sheet, Safety regulations, and record of arrivals and departures at the workplace
List of Practical Outputs
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.
Scale of assessment (preliminary/final): 0/100

Learning outcomes:
After completing the course, the student will be able to provide individualized nursing care to older adults and geriatric patients with various, predominantly chronic conditions, in diverse clinical settings, including community-based care facilitiess, emphasizing a holistic approach, clinically appropriate and safe practice, respecting the principles of evidence- based practice and within the scope of competencies of a nurse with a second degree in higher education. The student can apply the management of chronic symptomatology and patient safety. The student can think clinically and critically. The student can provide patients with adequate and high-quality nursing care in health and disease, respecting professional and ethical norms. The student is able to describe and apply procedures for standard nursing care and special diagnostic and therapeutic procedures in standard nursing units, intensive care units, and community facilities. The student can apply the nursing process method. He/she can apply theoretical knowledge to nursing practice in developing educational material and educational program for the needs of the clinical workplace in older adults and geriatric patient. Can apply theoretical knowledge in clinical practice in the development of educational material and educational programme for the needs of the clinical workplace. The student will acquire knowledge of technical innovations related to health and nursing care methods.

Class syllabus:
Implementation of the nursing process method in the care of the patient in the acute condition (in

case of acute admission) and the planned admission of the older adult or geriatric patient. Nursing physical examination of a patient.
Assessment of patient needs and problems, administration of measuring tools within the scope of the nurse´s competency (selected areas of assessment). Assessment of health risks and ensuring patient safety.
Management of symptomatology of chronic diseases.
Implementation of fundamental and specialised nursing techniques.
Management of health records within the scope of nursing care.
Nursing rehabilitation of the patient.
Discharge planning of the patient for home care and community care.
Targeted patient/ family education to acquire knowledge and practical skills during hospitalization and discharge planning for home care (self-management of symptomatology, adherence to treatment and regimens).
Implementation of patient/family education during hospitalization and before discharge to home care (self-management of symptomatology, adherence to treatment and regimen measures).
Elaboration of educational material or educational program in older adults or geriatric patient with a selected health condition for the needs of the clinical workplace.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-012/22	Nursing Research II-1

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 1 / 1 **per level/semester:** 14 / 14
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 2.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-005/22 - Evidence Based Nursing

Course requirements:
CPO (19 hours) preparation for the test.
The evaluation of students takes place in the form of a written knowledge test and evaluation of the elaboration of a research project for a diploma thesis.
The minimum percentage to succeed: 60 %.
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.
Scale of assessment (preliminary/final): 50/50

Learning outcomes:
By completion of the subject student gains knowledge of scientific methods in nursing. Student is able to search for literature sources, determine a research problem, and choose adequate research methods. Student is familiar with ethical requirements of the research on a human subject; is able to implement the research results into the practice, and based on the knowledge gained, is able to elaborate master's thesis.

Class syllabus:
Introduction to nursing research. Quantitative and qualitative research in nursing. Types of qualitative and quantitative research.
Research project (quantitative and qualitative) with a focus on the master's thesis.
Setting problems and goals in quantitative and qualitative research. Hypothesis in quantitative research.
Work with scientific literature, search, use, and processing. Evaluation of the quality of literary sources: quantitative and qualitative studies. Citation of bibliographic references.
Methods of empirical data collection in quantitative research. Selected methods: questionnaire and scales.
Methods of collecting empirical data in qualitative research. Selected methods: interview and focus group.
Thematic analysis method.
Determination of the research sample in qualitative and quantitative research. Method of selection and representativeness of the research sample.

Reliability and quality criteria in quantitative and qualitative research. Validity and reliability. Trustworthiness in qualitative research.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-018/19	Nursing Research II-2

Educational activities:
Type of activities: practicals
Number of hours:
per week: 1 **per level/semester:** 14
Form of the course: on-site learning

Number of credits: 2

Recommended semester: 3.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-012/22 - Nursing Research II-1

Course requirements:
CS (50 hours) study of literature and preparing for test.
The evaluation of students is carried out through written test; the minimum percentage to succeed is 60%.
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.
Scale of assessment (preliminary/final): 50/50

Learning outcomes:
Aims and Objectives: The Student is able to gain basic understanding of statistical data analysis, including the descriptive and inferential statistics. She/he can understand difference between a sample and a population, is aware of different types of variables, can translate a research hypothesis into the statistical one and can perform basic statistical data analyses. Student can test hypotheses to interpret results of data explorations and statistical analyses.

Class syllabus:
Population and sample, random variable. Representative sample. Methods of sample selection. Exploratory data analysis – plots and summary statistics, normality of distribution. Univariate and bivariate descriptive statistics of location, scale and shape of the distribution. Dependence, association, correlation and regression. Contingency tables. Hypothesis testing, p-value, evidence against the null hypothesis. Parametric tests of the population mean. Nonparametric tests and their limitations. Factor analysis: exploratory and confirmatory, reliability. Case studies from nursing.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-029/19	Nursing Research II-3

Educational activities:
Type of activities: practicals
Number of hours:
per week: 1 **per level/semester:** 14
Form of the course: on-site learning

Number of credits: 5

Recommended semester: 4.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-018/19 - Nursing Research II-2

Course requirements:
CPO (100 hours) - preparation of master's thesis
The evaluation of students is carried out through preparation of master's thesis, which is evaluated on the basis of the criteria stated in the opinion of the supervisor of the master's thesis.
The minimum percentage to succeed is 60%.
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.
Scale of assessment (preliminary/final): 0/100

Learning outcomes:
After completing the subject, the student will gain knowledge and skills about scientific methods in the field of nursing (quantitative and qualitative). Can search for relevant literary sources, determine the research problem, choose adequate research methods, select respondents for the elaboration of the diploma thesis. Can use methods of descriptive and inductive statistics and thematic analysis to evaluate data of quantitative and qualitative nature. She/he can know the ethical requirements of research on the human subject. Based on the knowledge, he/she is able to process a master's thesis.

Class syllabus:
Formal and content requirements for the preparation of the master's thesis - Directive of the Rector of Comenius University in Bratislava on the basic requirements for final theses, rigorous theses and habilitation theses, control of their originality, storage and access to Comenius University in Bratislava.
Elaboration of the current overview of knowledge at home and abroad on the topic of the diploma thesis.
Realization of the practical part of the master's thesis.
Preparation of results and defense of the master's thesis.
Preparation for comments and questions of the opponent's master's thesis.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-041/26	Nursing care for seniors and geriatric patients (1)

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 1 / 2 **per level/semester:** 14 / 28
Form of the course: on-site learning

Number of credits: 4

Recommended semester: 1.

Educational level: II.

Prerequisites:

Course requirements:
CPO (29 hours) continuous oral presentation of a selected topic in an exercise within the framework of the covered curriculum and a final written paper focused on a functional assessment of the senior. The minimum percentage to succeed is 60%.
Oral examination. The minimum percentage to succeed is 60%.
Overall evaluation: A: 100-91%, B: 90-81%, C: 80-73%, D: 72-66%, E: 65-60%, FX: 59 % and less.
Scale of assessment (preliminary/final): 40/60

Learning outcomes:
After completing the course, the student will be able to define and describe the characteristics of the aging of the Slovak population and its impacts on society, especially on the health and social system. He/she can describe national health programs focused on the senior population within the framework of healthy and active aging. He/she can characterize the tasks of gerontological and geriatric nursing in the context of physiological and patho-physiological changes and specifics of the senior population and geriatric patients with regard to the specific geriatric approach and nursing care. He/she can characterize and describe a frail senior, geriatric patient, individual symptoms and syndromes. He/she has an overview of measurement tools for assessing the health and functional status of a older adults and geriatric patient, and can use them within the competences of a nurse.

Class syllabus:
Aging of the Slovak population, socio-demographic and health characteristics, and its impact on the health and social system, the need and quality of nursing care.
Physical, psychological and social changes in seniors, adaptation mechanisms.
Theories of aging. Longevity, blue zones. Support for healthy and active aging - Decade of Healthy Aging 2021-2030. Support for independent and safe life of seniors in the context of demographic development and nursing care.
Needs of seniors in the context of nursing care.
Ageism - characteristics, causes, manifestations. Ageism in nursing care.
Health literacy of seniors and the role of nursing in increasing it.
Distribution and characteristics of the senior population in the context of nursing care.

Characteristics of frail and at-risk seniors. Nursing assessment of frailty, measurement tools within the competence of nurses, nursing diagnostics of frailty.
Gerontological and geriatric nursing and its tasks.
Geriatric patient and its characteristics according to the concept of geriatrics. Starting points and priorities of nursing care.
Geriatric patient – geriatric symptoms and syndromes, classification, overview. Geriatric syndromes in the context of nursing.
Comprehensive assessment of the health and functional status of a geriatric patient. Nursing tasks, measuring tools in the competence of a nurse.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-042/26	Nursing care for seniors and geriatric patients (2)

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 1 / 2 **per level/semester:** 14 / 28
Form of the course: on-site learning

Number of credits: 4

Recommended semester: 2.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-041/26 - Nursing care for seniors and geriatric patients (1)

Course requirements:
CPO (29 hours) oral presentation based on the selected geriatric syndrome; seminar paper focused on nursing care provided to a specific patient with a selected geriatric syndrome. Oral examination; the minimum percentage to succeed is 60%.
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59 % and less.
Scale of assessment (preliminary/final): 20/80

Learning outcomes:
After completing the subject, the student will acquire knowledge of nursing care for older adults and geriatric patients. The student will be able to describe the major geriatric syndromes, assess their clinical manifestations, and explain the principles of nursing management for patients with selected geriatric syndromes. The student will understand the principles of safe geriatric pharmacotherapy and identify age-related changes affecting medication use in older adults. Furthermore, the student will be able to explain the principles and specific features of palliative care and describe the role of the nurse in providing nursing care to patients with terminal illnesses. The student will also be able to educate patients and their families on the prevention and management of problems associated with selected geriatric syndromes. In addition, the student will be able to assess an electrocardiogram (ECG) by evaluating its technical quality, determining heart rate and heart rhythm, and identifying abnormal findings or pathological changes.

Class syllabus:
Nutrition and hydration: GS malnutrition and dehydration. Geriatric nutritional assessment. Malnutrition - risk factors, consequences, treatment and prevention. Management of care for patients with malnutrition and dehydration.
GS immobility and decubitus. Characteristics, prevalence, nursing diagnosis and interventions.
GS instability and falls. Characteristics, prevalence, programs aimed at minimizing falls, activation of seniors, training / strategies in fall prevention.
GS dementia, delirium, depression. Management of care for patients with neurocognitive disorders. Pain and sleep disorders in neurocognitive disorders. Pain classification. Assessment of pain in a patient with a neurocognitive disorder. Management of analgesic treatment based on the doctor's

indication, evaluation of treatment effectiveness, non-pharmacological pain relief procedures. Sleep disorders in a patient with a neurocognitive disorder. Obstructive sleep apnea. Management of patient care with sleep disorders.
GS neglect, abuse, abuse; violence against the older adults. Definition, epidemiology, risk factors, clinical symptoms, diagnostics, care management.
Safe gerontopharmacotherapy. Factors affecting all drugs in old age. Changes in the use of drugs in old age. Drug interactions, drug effects and specifics of their administration. Education of seniors about pharmacological treatment.
Palliative care for geriatric patients.
Geriatric syndrome: sensory deficit.
Communication with an older adults / geriatric patient.
Assessment of the ECG recording in terms of quality, heart rate and heart rhythm and identification of pathological values/changes.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-043/26	Nursing care for seniors and geriatric patients (3)

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 1 / 2 **per level/semester:** 14 / 28
Form of the course: on-site learning

Number of credits: 4

Recommended semester: 3.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-042/22 - Nursing care for seniors and geriatric patients (2)

Course requirements:
CPO (29 hours) seminar work. Independent work of the student, development of a case study in a geriatric patient during a selected surgical procedure with a focus on the specifics of perioperative nursing care, with analysis and application of the principles of early postoperative recovery (ERAS - Enhanced Recovery After Surgery) in the preoperative, intraoperative and postoperative phases.
Continuous assessment of the student during the exercises will be carried out in the form of solving and analysing case studies related to the topic of the lecture.
Oral exam
Students are assessed through the evaluation of seminar work and oral exam.
Overall assessment: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX: 59% and less.
Scale of assessment (preliminary/final): 40/60

Learning outcomes:
By completing the course, the student will have acquired knowledge about the specifics of perioperative nursing care, nursing care in injuries and interventional radiological procedures in older adults and geriatric patients. Students will be able to apply comprehensive geriatric preoperative assessment tools, analyse the specific clinical manifestations of surgical diseases in older adults and geriatric patients, and provide preoperative preparation according to the type, extent, and urgency of the planned surgical intervention. Students will be able to apply comprehensive geriatric preoperative assessment tools, analyse the specific clinical manifestations of surgical diseases in older adults and geriatric patients, and provide preoperative preparation according to the type, extent, and urgency of the planned surgical intervention. Students will demonstrate an understanding of the principles of the Enhanced Recovery After Surgery (ERAS) protocol and will be able to plan, implement, and evaluate evidence-based postoperative nursing care. They will be competent in the prevention and management of postoperative complications, including pain, fluid and electrolyte imbalance, nutritional disorders, postoperative delirium, and dementia. Furthermore, students will be able to apply the principles of perioperative nursing care, including patient education, in selected general surgical, cardiac surgical, orthopaedic, urological, gynaecological, ophthalmological, and vascular procedures in geriatric patients.

Students will also demonstrate proficiency in the use of the standardized SBAR communication framework to ensure effective clinical handover, interdisciplinary communication, and the management of critical situations in perioperative practice.

Class syllabus:

Integration of geriatric principles into surgical nursing care. Assessment of surgical risk, preoperative evaluation of health and functional status in older adults and geriatric patients, and the use of comprehensive geriatric preoperative assessment tools.

Specific aspects of preoperative preparation in geriatric patients with cardiovascular, respiratory, renal, and metabolic comorbidities in relation to the timing of admission (emergency, urgent, and elective surgery), type of anaesthesia (general and regional), extent of surgery (minor, intermediate, and major procedures), and surgical approach (open, minimally invasive, and robot-assisted surgery).

Application of the Enhanced Recovery After Surgery (ERAS) protocol in thoracic and abdominal surgery. Evidence-based principles of perioperative care during the preoperative, intraoperative, and postoperative phases. Nursing interventions aimed at reducing postoperative complications and shortening the length of hospital stay.

Specific aspects of nursing care for older adults and geriatric patients undergoing invasive procedures in interventional radiology.

Specific aspects of intraoperative nursing care for geriatric patients according to the type of anaesthesia (general and regional), extent of surgery (minor, intermediate, and major procedures), and surgical approach (open, minimally invasive, and robot-assisted surgery). Strategies to minimise the risk of anaesthesia-related complications in geriatric patients.

Management of postoperative nursing care in geriatric patients, including prevention of postoperative complications, postoperative pain management, management of fluid and electrolyte balance, nutritional support, prevention and management of postoperative delirium, and deterioration of dementia. Delayed postoperative recovery as a nursing diagnosis.

Management of perioperative nursing care in selected surgical procedures in older adults and geriatric patients, including atypical presentations of acute abdominal conditions; cardiac surgery for ischaemic heart disease, aortic stenosis, and cardiac arrhythmias; vascular reconstructive procedures and limb amputations; total joint arthroplasty; surgical management of benign prostatic hyperplasia; surgical treatment of female urinary incontinence and pelvic organ prolapse; cataract surgery; and biological treatment of diabetic retinopathy and age-related macular degeneration.

Management of nursing care for trauma in older adults and geriatric patients.

Specific aspects of nursing care in palliative surgical and interventional radiology procedures in geriatric patients.

Early postoperative discharge of geriatric patients to the home environment, including patient and family education on postoperative home care.

Indications for and performance of suturing of minor surgical wounds and removal of sutures from wounds healing by primary intention.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-001/18	Patient safety

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 1 / 1 **per level/semester:** 14 / 14
Form of the course: on-site learning

Number of credits: 2

Recommended semester: 1.

Educational level: II.

Prerequisites:

Course requirements:
CPO (15 hours) Project assignment focused on a selected adverse event. Written examination, the minimum percentage to succeed is 60%.
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59 % and less.
Scale of assessment (preliminary/final): 20/80

Learning outcomes:
After completing the subject, the student will be able to define and describe the fundamental principles of patient safety as an integral component of healthcare quality and demonstrate knowledge of the World Health Organization (WHO) International Classification for Patient Safety, as well as the relevant legislative framework of the European Union and the Slovak Republic. The student will be able to explain the concepts of safety culture, just culture, and blame culture and evaluate their significance for the quality and safety of healthcare delivery. The student will be able to define the adverse events monitored and reported within the Slovak healthcare system, describe the systems for monitoring and mandatory reporting of adverse events, and analyse the causes, risk factors, and prevention strategies for the most common adverse events associated with healthcare delivery. Furthermore, the student will be able to apply the principles of risk management to identify and prevent risks in selected healthcare settings, assess the importance of human factors, effective communication, and accurate patient identification in preventing adverse events, and evaluate the impact of adverse events on healthcare professionals and healthcare organizations.

Class syllabus:
Patient safety as an integral component of healthcare quality. WHO International Classification for Patient Safety and the legislative framework of the European Union and the Slovak Republic.
Safety culture, just culture, and blame culture.
Adverse events in healthcare; systems for reporting adverse events in the Slovak Republic and internationally.
Adverse events associated with healthcare delivery, including medication errors, patient falls, hospital-acquired pressure injuries, and healthcare-associated infections.
Risk management and patient safety in selected healthcare settings.

Human factors in patient safety. Effective communication and correct patient identification.
The impact of adverse events on healthcare professionals and healthcare organizations.
The concept of the second victim and support for healthcare professionals following an adverse event.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-014/26	Pedagogy in Nursing

Educational activities:
Type of activities: practicals / lecture
Number of hours:
per week: 2 / 1 **per level/semester:** 28 / 14
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 2.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-007/18 - Health Promotion and Prevention

Course requirements:
CPO (29 hours): preparation of a presentation on educational methods; analysis of relevant literature related to the semester project topic; development of an educational plan for health people and illness patient, their family, or a community.
The evaluation of students takes place in the form of evaluation of the semestral thesis and of the written test.
Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59 % and less.
The minimum percentage to succeed is 60%.
Scale of assessment (preliminary/final): 50/50

Learning outcomes:
After completing the subject, the student is able to apply theoretical knowledge of pedagogy and didactics to nursing practice - the student can acquire knowledge and skills in creation of educational materials. Additionally, he/she is able to capable of construction of educational plans for healthy or sick individuals as well as families and communities. The graduate of the course can define basic concepts in pedagogy and didactics. The graduate demonstrates the ability to use appropriate methods, forms and means of education. The student is able to develop and implement an educational plan for the individual, family, community. He/she is able to prepare educational materials for individuals, families or communities. This course also contributes to the formation of the correct attitude of the student in professional training in the field of counseling, consulting and providing education in nursing practice.

Class syllabus:
Pedagogy - concept and subject of pedagogy, fundamental pedagogical terms.
Education as a subject of pedagogy.
Self-education and self-knowledge.
Educational process. Key terms - education, educator, stages of the teaching process.
Goals and their function in education - concept, goal formulation, taxonomy.
Didactic principles in education.
Organizational forms of teaching in education.

Material-didactic means in education.
Teaching methods - concept, classification, activating teaching methods in nursing Pedagogical communication - principles, forms, methods.
Motivation in education.
Educational process in nursing - phases of the educational process.
Conditions of the educational process, factors influencing learning.
Educational materials - criteria for creating educational materials.
Creation of educational materials for individuals, families and communities with respect to developmental specifics.
Evaluation process in education - methods, competencies of nurses in evaluation, feedback in education, effectiveness of educational strategies.
Educational plan - creation of educational plan, structure of educational plan.
Preparation of an educational plan for an individual, family or community with regard to developmental specifics and disease.
Nurse in the role of advisor / consultant / teacher - competences of the nurse, present and future.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-010/22	Summer Practice (1)

Educational activities:
Type of activities: practice
Number of hours:
per week: **per level/semester:** 240s
Form of the course: on-site learning

Number of credits: 9

Recommended semester: 2.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-008/18 - Winter Practice (1)

Course requirements:
CPO (28 hours) elaboration of a seminar paper on the issue of recognition and management of the acutely deteriorating patient using ABCDE approach (application in the conditions of a clinical workplace of continuous clinical practice).
The conditions for evaluation the course (ABS0) of students is pursued by meeting the criteria of completing continuous clinical practice set out in the Record Book of the Clinical Practice (confirmed Allocation Sheet for a particular workplace, confirmed Safety Regulations, confirmed Record of Arrivals and Departures at the Workplace; a completed List of Practical Outputs) and evaluation of elaborated seminar paper.
Scale of assessment (preliminary/final): 0/100

Learning outcomes:
After completing the course, the student will be able to provide individualized nursing care to older adults and geriatric patients with various, predominantly chronic conditions, in diverse clinical settings, including community-based care facilities, emphasizing a holistic approach, clinically appropriate and safe practice, respecting the principles of evidence-based practice. The student can apply the management of chronic symptomatology and patient safety. The student can think clinically and critically. The student can provide patients with adequate and high-quality nursing care in health and disease, respecting professional and ethical norms. The student can improve basic and advanced nursing techniques and skills (theoretically and practically) and specific diagnostic and therapeutic techniques at the standard care and intensive care units and in community facilities. The student can apply the nursing process method with an emphasis placed on comprehensive patient assessment, physical examination within the scope of nurse's competency, administration of measuring tools to detect actual/ potential patient problems within the scope of the nurse's competency, masters planning and implementing (independent, collaborative or delegate) individualized nursing care, including discharge, planning and targeted patient/ family education. The student can describe and master the educational process, is able to apply theoretical knowledge to clinical practice in the implementation of the educational process in an older adult or geriatric patient.

Class syllabus:

Implementation of a nursing process method in the care of the patient in acute condition (in case of acute admission) and planned older adult or geriatric patient admission.
Physical examination of a patient within the scope of the nurse competency.
Objective assessment of patient needs and problems, administration of measurement tools and instruments within the scope of the nurse competency (selected areas of nursing assessment).
Assessing health risks and ensuring patient safety.
Management of symptomatology of chronic diseases.
Implementation of nursing interventions, procedures and techniques, documentation of care.
Nursing rehabilitation of the patient.
Discharge planning for home care and community care.
Patient/family education targeted to acquire knowledge and practical skills during hospitalization and discharge planning for home care (self-management of symptomatology, adherence to treatment and regimens).
Standardized communication of (critical) events in clinical practice using the SBAR method.
Standardized procedure of recognition and management of the acutely deteriorating patient using ABCDE approach within the scope of the nurse competency.

Form of the course: on-site learning

Number of credits: 9

Recommended semester: 1.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-003/22 - Nursing Practice (1)

Course requirements:
CPO (28 hours) elaboration of the educational plan for an older adult or geriatric patient.
Final evaluation of the student - communication skills, teamwork, attendance, grooming, hygiene and epidemiological regime, practical skills and theoretical knowledge, ethical standards.
Allocation sheet, Safety regulations, and record of arrivals and departures at the workplace
List of Practical Outputs
Scale of assessment (preliminary/final): 0/100

Learning outcomes:
After completing the course, the student will be able to provide individualized nursing care to older adults and geriatric patients with various, predominantly chronic conditions, in diverse clinical settings, including community-based care facilities, with an emphasis on a holistic approach, clinically correct and safe practice, and with respect for the principles of evidence-based practice. The student will be able to apply strategies of the chronic symptomatology management and patient safety. The student will demonstrate clinical and critical thinking. The student will be able to provide the patients with appropriate and high-quality nursing care in health and illness, while adhering to professional and ethical standards. The student will be able to desribe and apply procedures of standard nursing interventions as well as special diagnostic and therapeutic procedures in standard care units, intensive care units, and community facilities. The student will be able to apply the nursing and educational process method. The student will be able apply theoretical knowledge in clinical practice when implementing patient education for older adult or geriatric patients. In order to standardise communication of (critical) events in clinical practice, the student will be able to use the structured SBAR communication method effectively.

Class syllabus:
Implementation of the nursing process method in the care of the patient in the acute condition (in case of acute admission) and the planned admission of the older adult or elderly patient.
Nursing physical examination of a patient.
Assessment of patient needs and problems, administration of measuring tools within the scope of the nurse´s competency (selected areas of assessment). Assessment of health risks and ensuring patient safety.

Management of symptomatology of chronic diseases.
Implementation of fundamental and specialised nursing techniques.
Management of health records within the scope of nursing care.
Nursing rehabilitation of the patient.
Discharge planning of the patient for home care and community care.
Patient/ family education to acquire knowledge and practical skills during hospitalization and discharge planning for home care (self-management of symptomatology, adherence to treatment and regimens).
Elaboration of an educational plan for an older adult or geriatric patient.

COURSE DESCRIPTION

Academic year: 2026/2027

University: Comenius University Bratislava

Faculty: Jessenius Faculty of Medicine in Martin

Course ID:	**Course title:**
JLF.ÚO/J-2-OS-019/22	Winter Practice (2)

Educational activities:
Type of activities: practice
Number of hours:
per week: **per level/semester:** 240s
Form of the course: on-site learning

Number of credits: 9

Recommended semester: 3.

Educational level: II.

Prerequisites: JLF.ÚO/J-2-OS-017/22 - Nursing Practice (3)

Course requirements:
CPO (60 hours) elaboration of the nursing care for geriatric patient with selected geriatric syndrome (application)
Final evaluation of the student - communication skills, teamwork, attendance, grooming, hygiene and epidemiological regime, practical skills and theoretical knowledge, ethical standards.
Allocation sheet, Safety regulations, and record of arrivals and departures at the workplace
List of Practical Outputs
Scale of assessment (preliminary/final): 0/100

Learning outcomes:
After completing the subject, the student will be able to provide individualized nursing care to older adults or geriatric patients with various, predominantly chronic conditions, in a long-term care setting, with an emphasis on a holistic approach, clinically sound and safe practice, and adherence to the principles of evidence-based practice. He/she will be able to describe and apply standard nursing procedures and special diagnostic and therapeutic procedures in community settings. He/she can describe the steps of the educational process. He/she is able to apply theoretical knowledge in clinical practice in the implementation of the educational process in the older adults or geriatric patients. He/she is able to characterize the individual geriatric syndromes and apply theoretical knowledge in clinical practice in nursing care of geriatric patients with selected geriatric syndromes.

Class syllabus:
Implementation of the nursing process method in the care of the older adults or geriatric patients.
Nursing physical examination of a patient.
Assessment of patient needs and problems, administration of measuring tools within the scope of the nurse´s competency (selected areas of assessment). Assessment of health risks and ensuring patient safety.
Management of symptomatology of chronic diseases.
Implementation of fundamental and specialised nursing techniques.
Management of health records within the scope of nursing care.
Nursing rehabilitation of the patient.

Targeted patient/ family education to acquire knowledge and practical skills during the stay in community facility (self-management of symptomatology, adherence to treatment and regimens). Elaboration of seminar work focused on the processing of nursing care for patients with selected geriatric syndrome (application).
