Foreword of the Dean:

Dear Friends,

Academic years overlap and life at the faculty has flowed uninterrupted for decades, across generations of students and staff. We are currently fully engaged in the periodic evaluation of research, development, artistic, and other creative activities (VER 2026), whose results will show us whether we are conducting science at a high level.

We were surprised by an amendment to the **Standards for Habilitation and Inauguration Proceedings**, published last autumn by the Slovak Accreditation Agency for Higher Education (SAAVŠ SR), which obligates universities to reapply for program accreditations. Nonetheless, we have managed the challenging preparation of an abridged dental medicine study program — our students will begin the first year of the five-year curriculum this September.

Near the campus, a new hospital is rising. Given the intense construction activity, we are optimistic that the timeline will be met. With the University Hospital Martin, we share many collaborative initiatives — from the hospital's construction to establishing a new joint facility, the Institute of Clinical Immunology and Medical Genetics, as well as smaller projects such as creating a student chill-out zone at UHM.

To promote sports, we allocated funding for renovating the gym in the Mézeš institutes and launched an outdoor fitness area on Novomeského Street. As part of our engagement with the city of Martin, we signed a memorandum of cooperation covering physical education and sports development at the sports facility located near the university dormitory and canteen of Jessenius Faculty of Medicine, Comenius University.

In November 2024, Jessenius Faculty of Medicine was awarded the **Mayor of Martin's Prize** for excellent scientific and educational achievements, marking the faculty's 55th anniversary.

Last year, following the summer holidays, we celebrated the completion of new parking areas in front of the dormitory on Novomeského Street and beautifully landscaped surroundings. Also, our efforts to support simulation-based teaching paid off: the Ministry of Education approved our project, and the faculty decided to invest in adding an entire new floor to the Academic Information Center. Investment activities continue — thanks to securing non-repayable funding, we are launching a photovoltaic power plant on the BioMed building.

The 46th Student Scientific Conference was again outstanding, with nearly fifty submitted papers. Our students continue to surprise us with their versatility — in addition to longstanding events, they consistently find new ways to express themselves. For example, the faculty magazine *Omphalus Martinensis* placed among the top three in its category at the "Štúrovo pero" contest, and for the second consecutive year, the faculty had a strong presence at the international **Rallye Rejvíz** competition for medical rescue teams.

We continue to revise our curriculum with a focus on clinical skills and the development of new subjects reflecting the needs of 21st-century healthcare, including digitalization and AI integration. The recent

KONMED conference in Žilina confirmed that educators, student organizations, the Žilina self-governing region, relevant ministries, and healthcare institutions share a common goal: to provide high-quality education and shape environments that our future healthcare professionals will enter. Our efforts are bearing fruit — for instance, the recent removal of the requirement for all current specialty-training doctors to compose and defend a written thesis is a significant step forward.

Let us continue to work and learn in a safe environment — and may our daily endeavors in each new academic year pave the way for success, guiding us forward both professionally and personally.

PROFILE OF A GRADUATE

STUDY PROGRAM OF GENERAL MEDICINE (joint programme of undergraduate and postgraduate cycles)

PREAMBLE

Jessenius Faculty of Medicine in Martin, Comenius University in Bratislava (JFMED CU), is an institution whose tasks include educating doctors capable of providing healthcare to citizens at the level of current knowledge. Based on this task, our goal is to prepare graduates who have the following qualification characteristics:

1. The graduate of JFMED CU have a command of the basic principles of medicine and should be able to apply them in their profession. They are generally educated and well-prepared professionally so that they are able to understand the existence and significance of the connections between medicine, natural sciences, and society, and are able to apply this knowledge in their work.

2. They have theoretical knowledge of the morphology and function of individual organs and systems of a healthy human being, as well as the origin and course of pathological morphological and functional changes, which enables them to interpret and apply this knowledge correctly for the rational promotion of health, prevention, diagnosis, and treatment of diseases.

3. They have mastered the basic methods of medical examination using simple instrumentation and basic laboratory and examination methods, including diagnosis, differential diagnosis, and treatment of more common diseases. In life-threatening situations, they have also mastered the basics of providing qualified assistance.

4. The graduate has good theoretical and practical clinical skills that enable them to provide healthcare at the appropriate level of the organizational structure under the professional guidance of an experienced physician.

5. By studying at JFMED CU, the graduate acquires the ability and willingness to continue their education.

6. Graduates of the JFED CU should understand human health and disease as the result of the interaction of genetic, biological, physical, chemical, psychological, emotional, spiritual, social, and other environmental influences on the human organism.

7. The graduate should be a convinced supporter of modern trends in the development of medicine, represented mainly by the concepts of primary disease prevention and health promotion with an emphasis on the preference for a healthy lifestyle.

8. JFMED graduates should be bearers of basic humanitarian principles and should cultivate and maintain a sense of a hierarchy of values in which altruism, empathy, respect for life, respect for human dignity, and patient rights are at the highest levels.

9. JFMED graduates master the principles of medical psychology and ethics, which they will follow in their professional activities in relation to sick people, their relatives, and their surroundings.

10. JFMED graduates will also be prepared to work in primary health care. They will master the basic principles and organization of healthcare and the basic medical legal norms necessary for the practice of their profession.

11. JFMED graduates will acquire the prerequisites to obtain a specialization in individual medical fields or to pursue a career in medical research after completing the required practical training, postgraduate studies, and examinations.

12. The graduate masters the basics of scientific work in theoretical and clinical disciplines and modern methods of obtaining scientific and professional information.

The graduate profile is published in full on the website:

MATRICULATION OATH OF THE 1st YEAR STUDENTS

We, the students of the 1st year matriculated at the Jessenius Faculty of Medicine in Martin today, swear that:

- we will fulfil all obligations of a member of academic community of Comenius University and the Jessenius Faculty of Medicine,
- we will hold esteem of famous humanistic and democratic tradition of our Alma mater,
- we will be a credit to our Alma mater and we will study in a way bringing general benefit.

GRADUATION OATH OF GRADUATES OF GENERAL MEDICINE STUDY BRANCH

In diplomate doctoris medicinae concedendo hocce iuramentum sollemne praestare volo. Fateor igitur:

primo: me curae infirmorum eorumque valetudinis tutamini totam vitam meam consecraturum,
secundo: me officia professionis meae semper diligenter, honorate atque honeste secundum recentissimam artis medicae notitiam investigatione nixam et praxi probatam fideque ideo dignam nunc et hodie ratam ac firmam exsecuturum,
tertio: me hominum morbis leniendis et vitae humanae usque ad eius finem naturae debitum tutandae operam daturum neque abusurum umquam tam cognitionibus medicis de statu valetudinis cuiuslibet aegroti quam conditione mea contra morum praecepta vel contra veritatem ipsam,
quarto: me in morbis oppressos animo fore sincero et recto veraque de morbis et eorum therapiis professurum, me tamen concordem aegris praestando neque umquam dignitatem laedendo,
quinto: me silentium medicum a primo aegroti occursu neque aliter hoc mortuo servaturum,
sexto: in arte medica exercenda nihil sane auctoritatis apud me habere posse nec nationalitatem nec genus nec religionem nec rationes politicas nec conditionem socialem cuiusvis aegroti,
septimo: me biologicam, intellectualem, socialem vim et naturam aeque ac dignitatem humanam cuiusvis aegroti nunquam contempturum,
octavo: me laboris consortes observatione debita culturum horumque operam tamquam ad salutem eorum, quibus mederi velimus, pertinentem aestimaturum, immo necessitate coactum animo fidenti a proximis quibusque medicis probatissimis et studio speciali excultis auxilium sedulo postulaturum,
nono: me piam habiturum perpetuamque memoriam Universitatis Comenianae nec non eius Facultatis Iessenianae medicae, in qua artem medicam didicerim et diploma medicinae doctoris accepturus sim,
decimo: me hoc iure iurando nulla vi coactum, verum et libere et mea voluntate et optima fide obstringi.

HIPPOCRATIS IUSIURANDUM

Per Apollinem medicum et Aesculapium Hygeamque ac Panaceam iuro deosque omnes itemque deas testes facio me hoc iusiurandum et hanc contestationem pro viribus et iudicio meo integre servaturum esse:

Praeceptorem, qui me hanc edocuit artem, parentum loco habiturum, vitam communicaturum eaque, quibus opus habuerit, imperiturum; eos item, qui ex eo nati sunt, pro fratribus masculis iudicaturum artemque hanc si discere voluerit, absque mercede et pacto edocturum, praeceptionum ac auditionum reliquaeque totius disciplinae participes facturum, tum meos, tum praeceptoris mei filios, immo et discipulos, qui mihi scripto caverint et medico iureiurando addicti fuerint, alium vero praeter hos nullum. Ceterum quod ad aegros attinet sanandos, diaetam ipsis constituam pro facultate et iudicio meo commodam, omneque detrimentum et iniuriam ab eis prohibebo. Neque vero ullius preces apud me adeo validae runt, ut cuipiam venenum sim propinaturus neque etiam ad hanc rem consilium dabo. Similiter autem neque mulieri talum vulvae subditicium ad corrumpendum conceptum vel fetum dabo. Porro caste et sancte vitam et artem meam conservabo. Nec vero calculo laborantes secabo, sed viris chirurgiae operariis eius rei faciendae locum dabo. In quascumque autem domus ingrediar, ob utilitatem aegrotantium intrabo, ab omnique iniuria voluntaria inferenda et corruptione cum alia, tum praesertim operum veneriorum abstinebo, sive muliebria sive virilia, liberorumve hominum aut servorum corpora mihi contigerint curanda. Quaecumque vero inter curandum videro aut audivero, immo etiam ad medicandum non adhibitus in communi hominum vita cognovero, ea siquidem effere non contulerit, tacebo et tamquan arcana apud me continabo.

Hoc igitur iusiurandum mihi integre servanti et non confundenti contingat et vita et arte feliciter frui et apud omnes homines in perpetuum gloriam meam celebrari. Transgredienti autem et peieranti his contraria eveniant.

THE HIPPOCRATIC OATH

I swear by Apollo the physician, by Æsculapius, Hygeia, and Panacea, and I take to witness all the gods, all the goddesses, to keep according to my ability and my judgement, the following Oath:

To consider dear to me as my parents him who taught me this art; to live in common with him and if necessary to share my goods with him; To look upon his children as my own brothers, to teach them this art if they so desire without fee or written promise; to impart to my sons and the sons of the master who taught me and the disciples who have enrolled themselves and have agreed to the rules of the profession, but to these alone the precepts and the instruction.

I will prescribe regimens for the good of my patients according to my ability and my judgment and never do harm to anyone.

To please no one will I prescribe a deadly drug nor give advice which may cause his death. Nor will I give a woman a pessary to procure abortion.

But I will preserve the purity of my life and my art.

I will not cut for stone, even for patients in whom the disease is manifest; I will leave this operation to be performed by practitioners, specialists in this art.

In every house where I come I will enter only for the good of my patients, keeping myself far from all intentional ill-doing and all seduction and especially from the pleasures of love with women or with men, be they free or slaves. All that may come to my knowledge in the exercise of my profession or in daily commerce with men, which ought not to be spread abroad, I will keep secret and will never reveal.

CARMEN IOCOSUM

(medieval student anthem, today Gaudeamus Igitur)

1. **Gaudeamus igitur,**
iuvenes dum sumus;
post iucundam iuventutem,
post molestam senectutem
nos habebit humus.
2. Vita nostra brevis est,
brevi finietur;
venit mors velociter,
rapit nos atrociter,
nemini parcetur.
3. Ubi sunt, qui ante nos
in mundo fuere?
Vadite ad superos,
transite ad inferos.
Ubi iam?
4. **Vivat academia,**
vivant professores,
vivat membrum quodlibet,
vivant membra quaelibet,
semper sint in flore!
