Foreword of the Dean:

Dear employees, students, and friends of the Martin Faculty,

If you feel that the new yearbook has arrived a little too soon, you are right. Although time flies, we have managed to accomplish quite a lot together from September 2025 to August 2026.

There was a lot of news right from the start of September. Dental Medicine students began a five-year study programme. The faculty held its first Diamond Jubilee Graduation Ceremony for graduates of 1965. New parking arrangements were introduced at Malá Hora. Throughout the year, we continued to focus on upgrading technologies and building operating systems in order to reduce energy consumption. In October, two photovoltaic power plants were put into operation on the Biobank and BioMed buildings, while the boiler room at the Štefánik Institute was renovated and a new switchboard was installed to improve heating efficiency. The roof of the Viliam Mézeš Institutes of Theoretical Medicine building was repaired. The first complete renovation of the gymnasium was completed in January this year.

We also intend to continue using renewable energy sources for electricity generation, promoting waste sorting, modernising our buildings, and participating in activities that take environmental protection into account. We have also focused on modernising educational technologies. A new videoconferencing system was installed, and the sound system in the Aula Magna was upgraded.

Many of our activities stem not only from our membership in the European infrastructures for translational research, EATRIS ERIC, and biobanking, BBMRI, but above all from the fact that we serve as the national nodes in both of these networks. In June 2026, the final meeting of the BIOFORD project consortium took place. This marked the completion of a unique six-year project which, as the first of its kind in Slovakia, brought significant progress in biobanking and biomedical research, contributed to the development of international cooperation, and helped improve the quality of healthcare services.

We worked closely with the Ministry of Health on both nationwide Medifutura – Your Future Is in Slovakia events, aimed at medical students as well as students of other healthcare disciplines, who were personally invited to the event by the Minister of Health.

There were also new developments in extracurricular and leisure activities. For the first time, our students successfully competed at the EduRescue event in Liptovská Osada. At the faculty, they organised the Anatomy Tournament and Medi Slam, a competition in the performance of original poetry that also makes use of body language. After a longer break, we revived the tradition of the Dean's Sports Day with its 30th edition. And apparently, a little extra motivation helped us break records for the number of participating teams in the Bike to Work challenge.

As part of our international activities, we strengthened cooperation with Iceland in research and education, hosted international lecturers, and welcomed NATO representatives. In addition to participating in established events, we made our debut at the European Association for International Education (EAIE)

conference in Gothenburg, where the faculty was part of the national stand of the Slovak Republic under the auspices of the Ministry of Education. We were also happy to bring back Picnic Day, which brings together students from different cultures and nations and continues to grow in popularity.

We have become accustomed to the construction activity surrounding the new hospital. Every day, we watch it take shape. The building reached its highest point in spring, marked by a ceremonial topping-out ceremony. In summer, construction moved into another phase, with the ongoing work already forming part of the next project milestone.

Keeping pace with the times is challenging, but essential, and our curriculum has once again required adjustment. Several changes lie ahead, including new courses focusing on health informatics, telemedicine, and AI. We are working intensively to prepare the premises for the expansion of the Academic Information Centre. This demanding process will affect the activities of all departments in the building and will require a great deal of patience. Patience will also be needed as we put the provisions of the new Higher Education Act into practice and incorporate them into the life of the faculty.

The Jesseniova Faculty of Medicine, Comenius University should also be visible and heard in non-traditional fields and should resonate throughout society. This is why we supported the Dotyky a spojenia festival and were proud to be one of its partners.

Recently, I came across a recipe for a happy life inspired by the work of Czech writer Karel Čapek. It is very simple, so I would like to offer it to you as a final thought: Whatever we do, let us do it out of love for the thing itself; the result will be worth it.

Overview of Accredited Study Programmes in English at the Jessenius Faculty of Medicine, Comenius University

General Medicine study program in the English language, duration of study: 6 years, Academic degree: MUDr./M.D.

PROFILE OF A GRADUATE

STUDY PROGRAM OF GENERAL MEDICINE (joint programme of undergraduate and postgraduate cycles)

PREAMBLE

One of the missions of the Jessenius Faculty of Medicine, Comenius University in Martin, is to educate doctors capable of providing healthcare to citizens in accordance with the current state of knowledge. Building on this mission, our aim is to prepare graduates who meet the following qualification profile:

1. A graduate of JFMED CU has a sound knowledge of the fundamental principles of medicine and is able to apply them in their professional practice. They are generally educated and well-prepared professionally so that they are able to understand the existence and significance of the connections between medicine, natural sciences, and society, and are able to apply this knowledge in their work.

2. They have theoretical knowledge of the morphology and function of individual organs and systems of a healthy human being, as well as the origin and course of pathological morphological and functional changes, which enables them to interpret and apply this knowledge correctly for the rational promotion of health, prevention, diagnosis, and treatment of diseases.

3. They have mastered the basic methods of medical examination using simple instrumentation and basic laboratory and examination methods, including diagnosis, differential diagnosis, and treatment of more common diseases. In life-threatening situations, they have also mastered the basics of providing qualified assistance.

4. The graduate has good theoretical and practical clinical skills that enable them to provide healthcare at the appropriate level of the organizational structure under the professional guidance of an experienced physician.

5. By studying at JFMED CU, the graduate acquires the ability and willingness to continue their education.

6. Graduates of the JFED CU should understand human health and disease as the result of the interaction of genetic, biological, physical, chemical, psychological, emotional, spiritual, social, and other environmental influences on the human organism.

7. The graduate should be a convinced supporter of modern trends in the development of medicine,

represented mainly by the concepts of primary disease prevention and health promotion with an emphasis

on the preference for a healthy lifestyle.

8. JFMED graduates should be bearers of basic humanitarian principles and should cultivate and maintain a sense of a hierarchy of values in which altruism, empathy, respect for life, respect for human dignity, and patient rights are at the highest levels.

9. JFMED graduates master the principles of medical psychology and ethics, which they will follow in their professional activities in relation to sick people, their relatives, and their surroundings.

10. JFMED graduates are prepared to work in primary health care. They will master the basic principles and organization of healthcare and the basic medical legal norms necessary for the practice of their profession.

11. JFMED graduates will acquire the prerequisites to obtain a specialization in individual medical fields or to pursue a career in medical research after completing the required practical training, postgraduate studies, and examinations.

12. The graduate masters the basics of scientific work in theoretical and clinical disciplines and modern methods of obtaining scientific and professional information.

The graduate profile is published in full on the website:

MATRICULATION OATH OF THE 1st YEAR STUDENTS

We, the students of the 1st year matriculated at the Jessenius Faculty of Medicine in Martin today, swear that:

- we will fulfil all obligations of a member of academic community of Comenius University and the Jessenius Faculty of Medicine,
- we will hold esteem of famous humanistic and democratic tradition of our Alma mater,
- we will be a credit to our Alma mater and we will study in a way bringing general benefit.

GRADUATES' OATH OF THE DEGREE PROGRAMME IN GENERAL MEDICINE

In diplomate doctoris medicinae concedendo hocce iuramentum sollemne praestare volo. Fateor igitur:

primo: me curae infirmorum eorumque valetudinis tutamini totam vitam meam consecraturum,

secundo: me officia professionis meae semper diligenter, honorate atque honeste secundum recentissimam artis medicae notitiam investigatione nixam et praxi probatam fideque ideo dignam nunc et hodie ratam ac firmam exsecuturum,

tertio: me hominum morbis leniendis et vitae humanae usque ad eius finem naturae debitum tutandae operam daturum neque abusurum umquam tam cognitionibus medicis de statu valetudinis cuiuslibet aegroti quam conditione mea contra morum praecepta vel contra veritatem ipsam,

quarto: me in morbis oppressos animo fore sincero et recto veraque de morbis et eorum therapiis professurum, me tamen concordem aegris praestando neque umquam dignitatem laedendo,

quinto: me silentium medicum a primo aegroti occursu neque aliter hoc mortuo servaturum,

sexto: in arte medica exercenda nihil sane auctoritatis apud me habere posse nec nationalitatem nec genus nec religionem nec rationes politicas nec conditionem socialem cuiusvis aegroti,

septimo: me biologicam, intellectualem, socialem vim et naturam aeque ac dignitatem humanam cuiusvis aegroti nunquam contempturum,

octavo: me laboris consortes observatione debita culturum horumque operam tamquam ad salutem eorum, quibus mederi velimus, pertinentem aestimaturum, immo necessitate coactum animo fidenti a proximis quibusque medicis probatissimis et studio speciali excultis auxilium sedulo postulaturum,

nono: me piam habiturum perpetuamque memoriam Universitatis Comenianae nec non eius Facultatis Iessenianae medicae, in qua artem medicam didicerim et diploma medicinae doctoris accepturus sim,

decimo: me hoc iure iurando nulla vi coactum, verum et libere et mea voluntate et optima fide obstringi.

HIPPOCRATIS IUSIURANDUM

Per Apollinem medicum et Aesculapium Hygeamque ac Panaceam iuro deosque omnes itemque deas testes facio me hoc iusiurandum et hanc contestationem pro viribus et iudicio meo integre servaturum esse:

Praeceptorem, qui me hanc edocuit artem, parentum loco habiturum, vitam communicaturum eaque, quibus opus habuerit, imperiturum; eos item, qui ex eo nati sunt, pro fratribus masculis iudicaturum artemque hanc si discere voluerit, absque mercede et pacto edocturum, praeceptionum ac auditionum reliquaeque totius disciplinae participes facturum, tum meos, tum praeceptoris mei filios, immo et discipulos, qui mihi scripto caverint et medico iureiurando addicti fuerint, alium vero praeter hos nullum. Ceterum quod ad aegros attinet sanandos, diaetam ipsis constituam pro facultate et iudicio meo commodam, omneque detrimentum et iniuriam ab eis prohibebo. Neque vero ullius preces apud me adeo validae runt, ut cuipiam venenum sim propinaturus neque etiam ad hanc rem consilium dabo. Similiter autem neque mulieri talum vulvae subditicium ad corrumpendum conceptum vel fetum dabo. Porro caste et sancte vitam et artem meam conservabo. Nec vero calculo laborantes secabo, sed viris chirurgiae operariis eius rei faciendae locum dabo. In quascumque autem domus ingrediar, ob utilitatem aegrotantium intrabo, ab omnique iniuria voluntaria inferenda et corruptione cum alia, tum praesertim operum veneriorum abstinebo, sive muliebria sive virilia, liberorumve hominum aut servorum corpora mihi contigerint curanda. Quaecumque vero inter curandum videro aut audivero, immo etiam ad medicandum non adhibitus in communi hominum vita cognovero, ea siquidem effere non contulerit, tacebo et tamquan arcana apud me continabo.

Hoc igitur iusiurandum mihi integre servanti et non confundenti contingat et vita et arte feliciter frui et apud omnes homines in perpetuum gloriam meam celebrari. Transgredienti autem et peieranti his contraria eveniant.

THE HIPPOCRATIC OATH

I swear by Apollo the physician, by Æsculapius, Hygeia, and Panacea, and I take to witness all the gods, all the goddesses, to keep according to my ability and my judgement, the following Oath:

To consider dear to me as my parents him who taught me this art; to live in common with him and if necessary to share my goods with him; To look upon his children as my own brothers, to teach them this art if they so desire without fee or written promise; to impart to my sons and the sons of the master who taught me and the disciples who have enrolled themselves and have agreed to the rules of the profession, but to these alone the precepts and the instruction.

I will prescribe regimens for the good of my patients according to my ability and my judgment and never do harm to anyone.

To please no one will I prescribe a deadly drug nor give advice which may cause his death. Nor will I give a woman a pessary to procure abortion.

But I will preserve the purity of my life and my art.

I will not cut for stone, even for patients in whom the disease is manifest; I will leave this operation to be performed by practitioners, specialists in this art.

In every house where I come I will enter only for the good of my patients, keeping myself far from all intentional ill-doing and all seduction and especially from the pleasures of love with women or with men, be they free or slaves. All that may come to my knowledge in the exercise of my profession or in daily commerce with men, which ought not to be spread abroad, I will keep secret and will never reveal.

CARMEN IOCOSUM

(medieval student anthem, today Gaudeamus Igitur)

1. **Gaudeamus igitur,**
iuvenes dum sumus;
post iucundam iuventutem,
post molestam senectutem
nos habebit humus.
2. Vita nostra brevis est,
brevi finietur;
venit mors velociter,
rapit nos atrociter,
nemini parcetur.
3. Ubi sunt, qui ante nos
in mundo fuere?
Vadite ad superos,
transite ad inferos.
Ubi iam?
4. **Vivat academia,**
vivant professores,
vivat membrum quodlibet,
vivant membra quaelibet,
semper sint in flore!
