

**CREDIT SYSTEM
IN THE SUBJECT OF MEDICAL BIOPHYSICS
STUDY PROGRAM: GENERAL MEDICINE
WINTER SEMESTER**

AIMS of the credit system of evaluation in the subject of Medical Biophysics are:

- 1) to provide high level of students` knowledge and compatibility of study contents in the subject of Medical Biophysics at Faculties of Medicine in the Slovak Republic as well as abroad (following the criteria of ECTS).
- 2) to activate all forms of instruction of students (lectures, practicals, seminars) with regular checking the students` knowledge in discussion, credit test and oral forms.

Awarding ECTS credits:

Total number of credits: 8, at the overall extent of study 30 hours/60 hours (lectures/practicals, seminars). The student is awarded for active participation at practical session, successful passing the continuous study check, successful passing the credit test and the exam.

The students` attendance at lectures is optional (but recommended).

The students` attendance at each practical sessions is compulsory.
