CREDIT SYSTEM
IN THE SUBJECT OF MEDICAL BIOPHYSICS
STUDY PROGRAM: GENERAL MEDICINE
WINTER SEMESTER

AIMS of the credit system of evaluation in the subject of Medical Biophysics are:

1) to provide high level of students` knowledge and compatibility of study contents in the subject of Medical Biophysics at Faculties of Medicine in the Slovak Republic as well as abroad (following the criteria of ECTS).

2) to activate all forms of instruction of students (lectures, practicals, seminars) with regular checking the students` knowledge in discussion, credit test and oral forms.

Awarding ECTS credits:

Total number of credits: 8, at the overall extent of study 28 hours/56 hours (lectures/practicals, seminars). The student is awarded for active participation at practical session, successful passing the continuous study check, successful passing the credit test and the exam.

The students` attendance at lectures is optional (but recommended).

The students` attendance at each practical sessions is compulsary.
